

# PLYWOOD

OUR COLLECTION OF PLYWOOD AND DETAILED  
INFORMATION

Established in 2018, Misarma Enterprise Sdn. Bhd. began as a dedicated supplier to the oil and gas industry before expanding into the timber sector. Today, we are recognized for our expertise in delivering high-quality sawn timber, plywood, and wood veneer products to a diverse range of industries.

Our team consists of highly dedicated and experienced professionals, committed to upholding the highest standards in both product quality and customer service. Guided by a core leadership team with a strong industry background, we continuously strive to innovate and enhance our offerings.

At Misarma, we are dedicated to customized solutions tailored to meet our clients' specific requirements. Our state-of-the-art manufacturing facility is equipped with the latest production systems and advanced machinery, ensuring precision, efficiency, and consistency in every product we deliver.

We take pride in being a trusted and reliable supplier, offering not just premium timber products but also a commitment to excellence, sustainability, and customer satisfaction.

For quality timber solutions that meet your needs, Misarma Enterprise Sdn. Bhd. is your preferred partner.

### **COMMERCIAL PLYWOOD**

Our Commercial plywood is designed for durability, flexibility and superior performance. With thickness options from 3mm to 18mm, it suits various applications, from furniture and cabinetry to structural and decorative use. We offer MR, WBP, Melamine, and CARB-compliant adhesives, ensuring strength and resilience for both interior and exterior projects.

### **FILM FACED PLYWOOD**

Engineered for strength and longevity, our film-faced plywood features a waterproof, wear-resistant coating on one of both sides, protecting the core from moisture, weather and heavy wear. Ideal for construction, formwork, and outdoor application, it ensures a smooth surface, easy maintenance and extended lifespan. Choose Film-Faced Plywood for a tough, reliable and high performance solution.

### **MARINE PLYWOOD**

Designed for superior water resistance, our marine plywood is crafted to endure harsh weather and moisture, making it ideal for boats, docks, and waterfront structures. Its high-strength core and durable bonding ensure long-lasting performance in marine and high-humidity environments. For reliable, weatherproof plywood, choose Marine Plywood.

### **BLOCKBOARD**

Crafted for durability and versatility, our blockboard features a core of wooden strips or blocks, sandwiched between premium plywood layers and bonded under high pressure. This construction ensures exceptional strength, stability, and resistance to warping, making it perfect for furniture, doors, and interior applications.

### **CHIPBOARD**

Crafted from compressed wood fibers, shavings, and sawdust, our chipboard offers a strong, smooth, and cost-effective solution for modern interiors. Bound with natural or synthetic resin, it provides excellent stability and workability, making it a top choice for furniture, cabinetry, and decorative applications.

### **PVC LAMINATED PLYWOOD**

PVC laminated plywood features multi-layered laminate sheets infused with Polyvinyl Chloride (PVC), providing a smooth, resilient surface. PVC Plywood offers enhanced durability and resistance to wear and tear thanks to its engineering method. Available in wide range of colours and textures, perfect choice for modern furniture, wall panels and interior applications.

### **POLYESTER PLYWOOD**

Our PVC laminated plywood features multi-layered laminate sheets infused with Polyvinyl Chloride (PVC), providing a smooth, resilient surface. Made by compressing paper and plastic resins under high pressure and temperature, it offers enhanced durability and resistance to wear and tear. Available in a wide range of colors and textures, perfect for modern furniture, wall panels, and interior applications, combining both aesthetic appeal and long-lasting performance.

### **LAMINATED VENEER LUMBER**

Laminated Veneer Lumber (LVL) is the premium choice for builders seeking strength and stability. Engineered to resist warping and twisting, it delivers superior load-bearing capacity, making it the ideal solution for beams, frames, and other high-performance structures. With its consistent quality and durability, LVL provides long-lasting reliability in both residential and commercial construction. Choose LVL for a stronger, more reliable foundation that stands the test of time.
