

TIMBER & WOODEN PACKAGING

ABOUT US

Started in 2018, Misarma Enterprise Sdn. Bhd. has evolved from an oil and gas supplies business company into timber industry. Our management and production lines feature competent builders who are led by a core team of dedicated and highly experienced staff who are consistently proven themselves in promoting the growth and success of the company.

We have committed to providing quality products and customized services, making us the high value supplier customers will call first when looking for pallets. To ensure the highest quality of products and to fulfil customers' needs, our factory is equipped with the latest and the most comprehensive production systems and machineries for various kind of wooden products manufacturing.

The wood type that we use for our wooden products is Acacia Mangium. All of our wooden pallets are made of Acacia Mangium, an environmentally friendly hardwood from Malaysia.

OUR PRODUCTS

Wooden Pallet

Irrespective of the kind of industry you are in, we can design and configure a suitable pallet to suit your warehousing and shipping needs that are compliant with international standards and requirements.

TWO WAY WOODEN PALLET

Two-way wooden pallet also known as Stringer Pallet because it uses “stringers” to support the unit load. It can be lifted by two sides (front and back) using lifting tools such as hand jack or fork-lift. A frame of 3 parts is used to build, which is top deck, stringer and bottom deck. When specifying a stringer pallet, the length (i.e. the length of the stringer) is noted first, and the width or length of the deckboards is noted second.

FOUR WAY WOODEN PALLET

Block pallet is a true 4-way pallet that use blocks of solid wood to support the unit load. Typically, block pallets use four to twelve blocks to support the top deck boards. It can be easily lifted in all four dimension (front, back, left, right) using lifting tools such as fold-lift and hand jack. Curiously enough, between the blocks and the deck boards are thin stringers. Which form a mat with the deck board. Block pallet can be designed with or without bottom deck boards, or a full perimeter base.

Pallet Designs

TWO WAY NON-REVERSIBLE CLOSED BOARDED PALLET

This pallet has two different faces – one top and one bottom facing. It is also closed boarded, meaning there are no seams between the nailed top boards.

WING TYPE PALLET

This pallet has different top and bottom deck. The horizontal stringers extend over the supporting blocks.

TWO WAY REVERSIBLE PALLET

The top and bottom deck of these pallets are identical; thus, they can be reversed to utilize both sides.

TWO WAY SINGLE DECK

Single deck pallets have one deck; they cannot be overturned. These are also known as Skids.

TWO WAY REVERSIBLE CLOSED BOARDED PALLET

The top and bottom deck of these pallets are identical; thus, they can be reversed to utilize both sides.

TWO WAY PLYWOOD PALLET

Two way pallet with a plywood for a deck instead of wooden boards.

Pallet Designs

FOUR WAY NON-REVERSIVAL PALLET

The top and bottom decks of these products are different and cannot be reversed.

FOUR WAY NON-REVERSIVAL CLOSED BOARDED PALLET

This four-way pallet has a more closed boarded deck with the wooden boards nailed closer together.

PLYWOOD BLOCK PALLET

The top decks of these products are using plywood and bottom built with block to offer maximum support for goods.

FOUR WAY PERIMETER BASE PALLET

This product has a flat top with base using runners around the perimeter of the base only for support. The pallet cannot be reversed.

Wooden Packaging Box

We offer wooden packing box, export packing box mainly to facilitate in keeping the products in the protected environment with the protection shield to keep it safer.

WOODEN BOX

WOODEN BOX WITH CORNER PROTECTION

WOODEN CRATE
