SHIP CHARTERING & MANAGEMENT SERVICES 1

Misarma Marine is a specialised ship-chandelling/ manager offering services to our esteemed customers who are engaged in operations and maintenance on offshore oil and gas installations, production rigs, and facilities. Since the initial operation of our company, we have formed a strong relationship with shipyards and ship owners. This gives our company access to a wide range of vessels such as:

- Anchor Handling Tug/Anchor Handling
- Tug Supply Vessel
- Towing Tug/ Tug Boat
- Flat Top Barge/ Transportation Barge
- Platform Supply Vessel/ Utility Supply Vessel
- Workboat Vessels

We aim to provide the highest standards of service to our customers at strategically located ports within Malaysia. Our company has a skillful blend of technical ability combined with business acumen which has made it renowned for its ability to manage specialised vessels profitably and efficiently.

As a specialised ship manager, we offer a professionally organised shore-based management team that is geared to work closely with owners to achieve the common goal of high-quality operations.

In addition, we can also enter into joint ventures with vessel owners to secure the best vessels to match clients' needs. We established a strong foundation of corporate governance and business integrity, and we adhere to the highest level of safety throughout our operations.

2 MISARMA MARINE WHARF

Misarma Marine operates in the same building as its parent company, Misarma Enterprise Sdn Bhd

In 1974, the formation of Malaysian oil and gas company PETRONAS led to cooperation between PETRONAS and Shell on oil exploration in the Miri region. Sarawak Operations (SKO) has tendered projects all around Miri Sea Water.

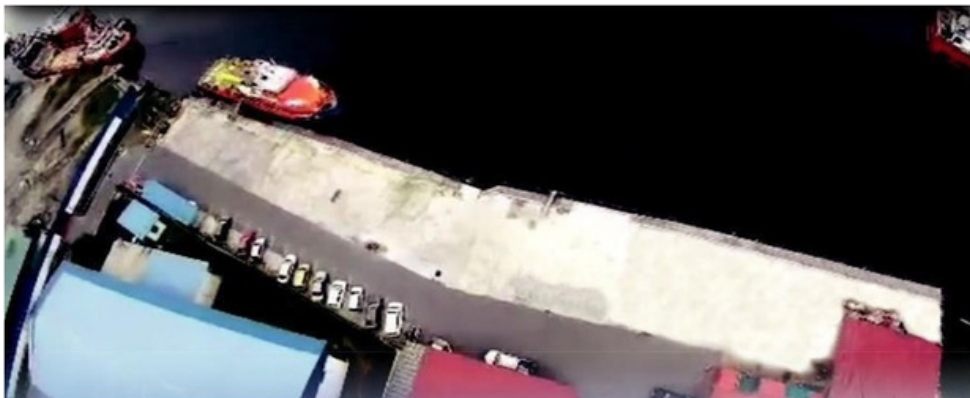

As an enhancement for the shipping and marine industry, the projects have become a market boomer. As there are numerous PETRONAS projects going on within Miri waters, it shows there is a demand for a marine wharf to act as a supporting center for all relevant operations.

Derived by the increasing installation and operation of offshore activities in Miri waters, the demand for reliable services, appropriate storage and, handling areas, and fast access to safe berths increases as well. Nevertheless, the famous Baong River also known as the Miri River plays a major role as a transit for loading operations, berthing, repair and maintenance services, and other related matters to shipping industries. Most importantly, it serves as the main route for vessels to gain entry and exit into Miri River and is also a central point of vessel berthing support.

Currently, we are pleased to extend our services to our major clients which are Sarawak Shell Sdn Bhd (SSB) and JX Nippon Oil and Gas Exploration (Malaysia) Limited. In enhancing our services to clients, our terminal and wharf layout are well-designed to meet the standards or requirements of our clients.

Misarma Marine Wharf offers more than meets the eyes. We provide variety of services and facilities. This has placed Misarma Marine among the preferred location for vessels to berth or dock before proceeding to the next destination.

3 BERTHING AND UNBERTHING SERVICES

Our wharf infrastructure allows clients to load and discharge structures, modules, and project cargoes in a safe and effective manner. It provides a single-stop solution to companies that require a quick turnaround of vessel operations, open yard support services, and end-to-end logistics solutions.

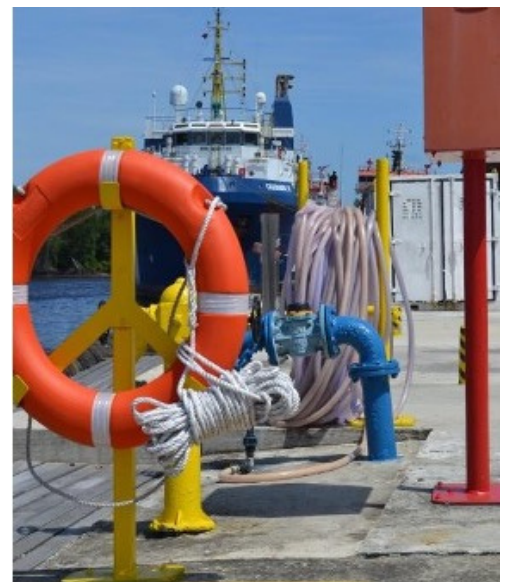

LIFTING SERVICES 4

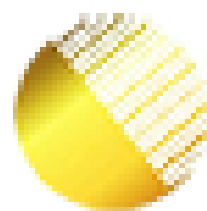

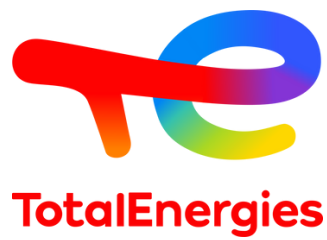

We offer professional lifting services to our clients whereby our services extends to various lifting equipment from the supply of shackles or lifting & hoisting tools to a complex fly away package of largepieces of equipment

5 FRESH WATER & ONSHORE POWER SUPPLY

Fresh water and power supply is available at all times. Delivery is through hydrants and the local electricity grid right where the vessels are berthed at.
